PROFILE SUMMARY

Result-oriented project team leader, currently holding an **Active TS/SCI Clearance with Polygraph**, with 2 ½ years of experience spanning software-related projects and product development. I am comfortable with ambiguity, thrive in fast-paced environments, and eager to learn new skills and provide a significant positive impact to end users.

EDUCATION

MEng Computer Science May 2024
Virginia Tech

BS Computer Science May 2023
Virginia Tech

RELEVANT EXPERIENCE

BTI360 | Herndon, VA

Software Engineer II Oct 2025 – Present

Software Engineer I Jun 2024 – Sept 2025

- Maintaining a React + Rails legacy web application supporting 7,000+ users in the federal space, handling full stack tasks in a fast-paced agile environment
- To date, have successfully carried out 25+ production deployments, collaborated across teams to support multiple MVIs, facilitated several Sprint Zero planning efforts, and provided direct technical support to end users.
- Named project Tech Lead in June 2025 amid shifting team and government resources.
- Onboarded two engineers in December 2025, enabling their transition onto the project by providing technical guidance

Sequoia | Reston, VA

Software Developer Intern May – Aug 2022

- Contributed to the development of a full life cycle web application designed to improve contract management.
- Developed a secure landing & login page with Angular for user management & authentication.
